1. Remove the lower cowl/wing fixing on both sides
2. Slide the valance into place so the tabs are under the lower cowl/wing fixing hole
3. Take a step back and look at the level of the valance, this is the time to fettle the valance so it looks level etc. When happy
4. Drill through the lower cowl/wing fixing hole so the valance tab is drilled through.
5. Put the fasteners through the lower cowl/wing fixing hole.
